Experienced: React Native, SQL, GraphQL, AWS, Feathers.js, REST APIs, Angular, Karma, C#, TeamCity, Jenkins

professional experience

YUMI *Senior Software Engineer* Remote | March 2023 - May 2023

- Implemented a full redesign of the website helloyumi.com, smartly utilizing flexbox and React components to deliver a responsive site with consistent styling and easy to maintain code cleaned of legacy concepts.
- Created a new version of a library for headings, text and images that standardized font-sizes, margin and padding across the site.

Thrived in this role for a short time, unfortunately a change in business model resulted in no need for a dev team

Evernote *Software Engineer II* Austin, TX / Remote | Oct 2019 - Feb 2023

- Played a significant role in bringing real time editing to Evernote including adding animated name cursor widgets and an isolated content locking system for multi-users attachment editing
- Added 8 user settings to the Desktop and mobile application to customize how a user sees common content within their notes, providing solutions for many of the most common support requests
- Built user interface for Google Calendar integration including ability to select calendars, view events, and create meeting notes, communicated regularly with API team to ensure accurate data syncing
- Maintained a rich text editing experience within the Evernote note editor across web, desktop and mobile platforms, including real time editing synchronization, keyboard shortcuts, list drag and drop, and more
- Implemented dark mode experience for note editor and dropdown menus across mobile and web platforms

vAuto / COX Automotive *Software Engineer II* Austin, TX | Dec 2016 - Oct 2019

- Migrated 4 key pages from Angular 1.5 to Angular 6, incorporating new features including Angular Router, Reactive Forms and Observables, improving page load time by 50% and reduced lines of code by 30%.
- Discovered and patched memory leaks and fixed sub-optimal setup in front-end unit test suite, optimizing time to run test suite by 75% and preventing builds from randomly failing due to loss of memory.
- Built and maintained RESTful APIs using .NET framework to retrieve data from Oracle DBs and Elasticsearch, ensuring customer retention by enabling reliable access to data points.
- Spearheaded initiative to consolidate unit and automation testing suites through organizing meetings with automation team, resulting in 30% reduction in time taken to run automation test suite.

HELLO WORLD *Lead Web Development Curriculum Designer and Instructor* Austin, TX | Oct 2016 - May 2019

- Created 4 levels of online web development curriculum for elementary and middle school students, including video lessons and assignments, enabling scaling of the web dev program to 60% more schools.
- Built an online course on how to program Parrot Mambo drones using JavaScript and Node.js
- Mentored 12 instructors to teach several classes of 30 students per semester
